

SECTIONAL TOOL STORAGE FROM AEM

## A Cleaner Leaner Way to Store Press Brake Tooling

Are your precision punch and die tools out of sight, disorganized, and prone to damage? With the Sectional Tool Storage (STS) System from AEM, your machine operators get visual access to tooling, that boosts productivity and minimizes wear and tear on the tools.

- » Visual workplace/lean concept design
- » Built-in pick points to move with forklift
- » Stocked in black or blue (custom colors available upon request)
- » Patented protective liners on internal rails
- » External rails utilize New Standard quick-release buttons
- » Cabinet dimensions 32"W x 29"D x 63"H
- » Ships LTL Freight
